

Vinicius R. Silva

Senior Software Engineer | Backend & Distributed Systems

Email: vrodrigues.code@gmail.com | LinkedIn: linkedin.com/in/rs-vinicius | GitHub: github.com/rsvinicius

PROFESSIONAL SUMMARY

Senior Software Engineer specializing in high-throughput JVM architectures, B2B billing/reconciliation engines, and mission-critical financial processing handling over 500M req/mo and +\$100B in global volume.

CORE SCALE METRICS

- * B2C Scale Throughput: +500M monthly requests across microservices (Alelo Brasil)
- * B2B Financial Volume: +\$100B global processed volume & automated reconciliation (Trustly)
- * Peak Backoffice Rate: +500 TPS batch processing, report streaming, and S3/ZIP delivery

WORK EXPERIENCE

Senior Software Engineer | Trustly (Global PayWithMyBank)

2022 - Present | Financial Technology & Global Banking Infrastructure

- Architected multi-tenant B2B billing and reconciliation pipelines processing +\$100B volume for 9k+ global merchants.
- Engineered high-scale Spring Batch and Quartz scheduler engines achieving +500 TPS under peak batch load.
- Implemented reactive S3/ZIP file streaming, eliminating memory pressure and reducing latency by 40%.

Software Engineer / Tech Lead | Alelo Brasil

4+ Years Consolidated | Payments & Card Infrastructure

- Scaled core transaction processing to +500M monthly requests serving 10M+ cardholders across 150k client businesses.
- Led legacy migration into resilient event-driven microservices with strict circuit-breaking and zero-downtime.

TECHNICAL SKILLS

- * Languages & Core: Java 21, Kotlin, Virtual Threads, JVM Internals, SQL
- * Distributed Systems: Spring Boot, Spring Batch, Kafka, RabbitMQ, Microservices, Redis
- * Cloud & Database: AWS (S3, ECS, RDS), PostgreSQL, Docker, Kubernetes, CI/CD

EDUCATION & CERTIFICATIONS

MBA in Software Engineering (Concluded) | Universidade de Sao Paulo (USP/Esalq)

Advanced distributed architectures, microservices scalability, and engineering management.

Bachelor of Science in Electrical Engineering | UNESP

Emphasis on control systems, automation, and computer science.
